

[Burn Out](#) is a calcium hypochlorite shock product that eliminates undesirable compounds like body oils, perspiration and urine. These compounds build up in your pool water and can cause a build-up of combined chlorine, cloudy water, strong odour and skin and eye irritation. Used every week, [Burn Out](#) prevents this build-up. If some of these problems already exist, [Burn Out](#) can eliminate them. It can also assist in killing resistant algae growth. [Burn Out](#) comes in convenient pre-measured 400-gram bags, making application easy and neat.

BioGuard Burn Out

To use Burn Out:

1.

Pre-dissolve 1 bag of [Burn Out](#) per 40,000 litres in a bucket of clean water. NOTE: When pre-dissolving, always add product to water. Do not add water to product as heat can be liberated.

2.

When the pool is not in use and preferably at night, pour the solution around the pool with the pump running.

3.

Do not swim until the free chlorine residual level falls to 5.0 ppm or less.

4.

Use every week as maintenance, and after heavy rainfall or high bather loads.

NOTE: Avoid physical contact with product. Do not store near petroleum products. Follow safety information on label instructions. Store in a cool, dry place. Keep out of the reach of children.
